Importing references into EndNote X7 using Primo Library Search
Updated 6 June 2018

1. Go to the Library webpage: https://www.ara.ac.nz/services-and-support/library

2. In the Primo Library search bar, type in the topic you would like to search and hit Enter. In this example we will use “Antarctica”.

3. For the resource you would like to import, click “Details” under the item information.
4. Click on the “EndNote” box. It will open EndNote Online in new window.

5. Login with your Ara profile login and password.

6. The reference will be added to "My References" list automatically.

Well done! You have now learned how to add a book reference from Primo Library Search to EndNote.
